Work Experience

Fullstack Developer – Brands Group Corporate Pvt. Ltd. **Jul 2025 - Oct 2026**

- Lead website development and CMS-based project delivery, coordinating activities across design, content, development, SEO, and technical support to ensure projects progress according to defined requirements and timelines.
- Own website projects from requirement understanding and planning through development, QA, deployment, and post-launch support, ensuring alignment with business objectives and client expectations.
- Work with SEO requirements during website development, including page structure, metadata, headings, URLs, image optimization, responsive behavior, performance, and other technical SEO fundamentals.
- Coordinate domain, hosting, deployment, website configuration, and post-launch maintenance activities.
- Built and maintained responsive web applications using React.js, Next.js, JavaScript, and WordPress,

giving the team strong technical oversight across website projects.

Front End Developer – ASVIX **Jan 2025 - Jun 2025**

- Worked as Frontend Lead for an AI-powered healthcare application, coordinating frontend implementation and collaborating with backend and other cross-functional stakeholders.
- Took ownership of frontend delivery from requirement understanding and UI planning through implementation, testing, refinement, and release.
- Collaborated with the team to translate product requirements into user-friendly interfaces, workflows, and actionable frontend tasks.
- Supported planning and prioritization of frontend tasks to ensure features were delivered according to project requirements.
- Worked with React.js, Tailwind CSS, Node.js, MongoDB, and Firebase while providing frontend leadership and technical coordination.
- Coordinated implementation of Firebase authentication, Razorpay payment integration, chatbot functionality, file uploads, and other application features.

Frontend Web Developer – Medilife Healthcare (Freelancing Project) **Apr 2024 - Jun 2025**

- Took ownership of frontend development and continuous website improvements for a healthcare platform connecting 2,500+ doctors and 3,000+ hospitals.
- Worked closely with project requirements to plan and implement website features, information architecture, search workflows, filtering systems, and UI improvements.
- Managed and optimized a large-scale dataset containing 40,000+ lines of JSON data, ensuring information was structured and efficiently presented to users.
- Designed and implemented advanced city, specialty, hospital, and doctor search/filtering functionality to improve content discoverability and user experience.
- Led UI improvements and feature redesigns based on usability requirements, ensuring responsive and user-friendly interfaces.
- Supported Google Ads campaign optimization and website visibility initiatives, giving exposure to the relationship between website quality, landing pages, and digital marketing.
- Managed project requirements independently, prioritizing tasks and delivering enhancements according to agreed requirements and timelines.
- Worked with React.js, Tailwind CSS, React Router, Context API, EmailJS, and administrative dashboards.

Front End Developer – SkillEcted (JASSAV Education Pvt. Ltd.) **Jul 2024 - Jan 2025**

- Led the website project from initial planning and development through deployment, using Graphy CMS with custom HTML, CSS, and JavaScript.
- Managed the implementation of website pages, course landing pages, content structure, and responsive layouts.
- Coordinated website content presentation and UI improvements to improve usability and learner engagement.
- Worked on SEO, accessibility, page performance, and responsive design during website development.
- Translated business and educational requirements into practical website features and page structures.
- Managed the website through deployment and supported ongoing updates and improvements.
- Mentored 50+ learners in frontend development and contributed to technical hiring and onboarding activities.

Sep 2021 - Sep 2023

Junior Web Developer – Brand Root Enterprise

- Managed and maintained WordPress and custom HTML/CSS/JavaScript websites.
- Handled website updates, UI enhancements, content changes, bug fixes, responsive layouts, and deployment support.
- Worked on website performance, reliability, and ongoing maintenance.
- Collaborated on website requirements and ensured requested changes were implemented accurately.
